TCP metrics and acknowledged goodput
speedtest.lax12.us.leaseweb.net:5207 | cubic | run bb4f212f
Congestion window vs goodput
snd_cwnd (segments)
Acknowledged goodput (Mbit/s)
Smoothed RTT vs goodput
RTT (ms)
Acknowledged goodput (Mbit/s)
Retransmission loss proxy vs goodput
Retransmitted segments / interval
Loss proxy is constant at zero
Acknowledged goodput (Mbit/s)
Elapsed time (s)
Each point pairs one endpoint snapshot/loss count with that interval's goodput.
Color shows elapsed sending time. Correlation does not establish causation.
